Age	Vaccine	If provided free of cost in Govt Set up	Brand/Manufacturer	Indian Rupees per Vial or package	Indian Rupees per dose* (Approx cost)
10 to 12 years	Tdap/Td	NO	BOOSTRIX by GSK Pharmaceuticals Ltd	1098 (1 dose)	1098
	HPV	NO	CERVARIX by GSK Pharmaceuticals Ltd	2405 (1 dose)	2405
			GARDASIL by MSD Pharmaceuticals Pvt Ltd	3259 (1dose)	3259

*Range of cost varies with ampoules of injection available. For example a 10 ml of ampoule will cost lesser per dose of 0.5ml when divided, than a 0.5 ml ampoule

FLU VACCINE

Additionally to the above mentioned IAP schedule, paediatricians also recommend an influenza vaccine which protects from Influenza Vaccine (A&B), H1N1 Vaccine (Swine Flu). The following are the brands with their cost, which are available in India:

VAXIGRIP JUNIOR 0.25 ML PREFILLED SYRINGE by Sanofi India Ltd	556 Rupees
INFLUVAC JUNIOR INJECTION Abbott India Ltd	760 Rupees

PLEASE NOTE:

1. Prices are as that of on February 2018, Variations may occur in the upcoming months.
2. Prices differ from one company to another, unlike in the West. Local taxes apply
3. Prices are only indicative, and subject to variation.
4. The charges at a Paediatrician's clinic may also include OPD/consultation charges, hence total cost may vary.
5. The cost also varies depending on the amount vaccine in a vial bought. Single vaccine vial will cost more; hence cost of some of the vaccines has been mentioned as single dose or multiple dose.
6. The choice of DPT combination vaccine may change the immunization schedule. To know how, first read my post: [Painful versus painless vaccines – Article on different DPT combination vaccines](#)
7. Please also download the Recent immunization schedule by IAP -2014, which I have simplified and colour coded from this link: [IMPORTANT: Indian Immunization schedule recommended by Indian Academy of Pediatrics \(with 2014 modifications\)](#). The Immunization schedule of Indian Academy of Paediatrics (IAP) and Government recommended Universal Immunization Programme (UIP) are two different schedules.
8. Do consult your doctor thoroughly before every vaccination.
9. Cost of booster may cost less (200 -500 Rupees) than the main vaccine.
